

Find employees and government services at Job Market Finland

Using the Job Market Finland online service, you can find information and services that support you as an employer. When you log in to Job Market Finland and create a job posting, the service will suggest suitable job seekers for you. You can also search for interesting candidates from the job applicant profiles with different search keywords.

When creating a job posting, it is important that you

- write a descriptive title and job description, based on which Job Market Finland suggests job applicant profiles suitable for your needs and
- choose skill requirements for the posting carefully, as they help job seekers find your posting.

Job applicant profiles are displayed anonymously to the employer, but through the service you can contact job seekers that interest you.

In the Suomi.fi service, you can authorise another person to access Job Market Finland on behalf of your organisation or request an authorisation for yourself to act on behalf of the organisation. You do not need to be authorised if you are a CEO, a private trader, or an employee with the sole right of representation.

Job Market Finland also provides you easy access to the E-services of TE Services

They contain government services such as applying for a pay subsidy and making a payment application.
